

# Control Network - Mauritius

THE MOUNT

ROCHE NOIRES

## Background

The Ministry of Housing and Lands (MHL) identified the need to develop a new geodetic datum to support and maintain the Digital Cadastral Database (DCDB) in line with Government initiatives to modernize land administration in Mauritius.

In 2008, Landgate (Australia) undertook a rigorous assessment of all available geodetic survey data comprising the 1934 triangulation survey, and GPS surveys conducted in 1994 and 2001. This analysis revealed that these surveys, either in combination or singularly, were not of sufficient accuracy for the basis of a new geodetic datum. In addition, new GPS observations were required to accurately position the Island of Mauritius in a global sense. Landgate recommended a new GPS survey, with stringent survey practices, to deliver the required accuracy. This survey was conducted by MHL in July 2008 and Landgate processed the data with assistance from Geoscience Australia (GA) and determined the new datum through rigorous network adjustment.

The new Geodetic Datum for Mauritius is named Geocentric Datum of Mauritius 2008 (GDM2008) and derivative mapping coordinates based on Universal Transverse Mercator (UTM) is named Map Grid of Mauritius 2008 (MGM2008). The datum is based on the World Geodetic System 1984 (WGS84) reference ellipsoid. The reference coordinates in International Terrestrial Reference Frame (ITRF) 2005@2020 were derived for two datum points namely Grand Bassin and The Mount and the GPS surveys were adjusted on these two datum points by least square adjustments.

Based on the above adjusted primary control points, the Geodetic Project Team of the Cadastre Unit designed, observed and processed a secondary GPS network consisting of 61 control points spread over the whole island. This network included 17 primary control points which were held fixed during adjustment and the resulting average error ellipse of the adjusted points for both the semi major and semi minor axes are 6mm. The whole exercise was carried out between 2010 and 2012.

To cater for plane surveys, a plane coordinate system has been devised that minimizes the effect of projection scale factor. It is based on GDM2008 datum and Lambert Conformal Conic Two Parallel map projection and is referred to as the Local Grid Mauritius 2012 (LGM2012).

This manual consists of the following:

- (i) List of Coordinates in
  - a. Geocentric Datum of Mauritius 2008 (GDM2008) - Geographical coordinates
  - b. Map Grid of Mauritius 2008 (MGM2008) - UTM40S, GDM2008
  - c. Local Grid Mauritius 2012 (LGM2012) - LCC 2P, GDM2008
  - d. Le Pouce Grid (LCO 1P, Clarke 1880)
- (ii) Technical Specifications of the Coordinate Systems
- (iii) Transformation parameters
- (iv) Description of Control Points

**As per the Cadastral Survey (Land Surveys) Regulations 2013, GDM2008, MGM2008 and LGM2012 are the Official Datum of Mauritius. Le Pouce Datum will be gradually phased out.**

## TECHNICAL SPECIFICATIONS OF GEOCENTRIC DATUM OF MAURITIUS

### 1. Reference Frame

- (a) Reference Frame: ITRF 2005 Epoch at Day 1 year 2020
- (b) Associated Ellipsoid: WGS84 Ellipsoid

### 2. Associated Ellipsoid

The 4 fundamental defining WGS84 ellipsoid parameters are –

Parameter	Notation	Value
Semi-major axis	a	6378137.0 m
Reciprocal of Flattening	1/f	298.257223563
Angular Velocity of the Earth	$\omega$	$7.2921150 \times 10^{-5} \text{ rad s}^{-1}$
Earth's Gravitational Constant (Mass of Earth's Atmosphere Included)	GM	$3.986004418 \times 10^{14} \text{ m}^3 \text{ s}^{-2}$

### 3. Geodetic and Map Grid Coordinates

- (a) Geodetic Coordinates shall be based on the Reference Frame and Associated Ellipsoid and referred to as the Geocentric Datum of Mauritius 2008 (GDM2008);
  - (b) Cartesian Map Grid Coordinates shall be derived from GDM2008 and based on the Universal Transverse Mercator (UTM) Projection for Zones 40S and 41S with Central Meridians (CM) at Longitudes 57° E and 63° E respectively and referred to as the Map Grid of Mauritius 2008 (MGM2008).
-

4.

**LOCAL GRID MAURITIUS 2012**

The LGM 2012 shall be based on the following parameters –

- (a) Datum : GDM 2008
  - (b) Origin : Verdun PTP0391
  - (c) Projection : Lambert Conformal Conic Two Parallel
  - (d) Central latitude : 20° 16' 31.85868" S
  - (e) Central longitude : 57° 33' 52.40384" E
  - (f) False easting at Origin : 250,000.00 mE
  - (g) False northing at Origin : 350,000.00 mN
  - (h) Parallel 1 : 20° 03' 40.0" S
  - (i) Parallel 2 : 20° 26' 40.0" S
  - (j) Scale factor at parallels : 1.00000
-

5.

**LE POUCE GRID**

(a) Grid	: Le Pouce Grid
(b) Origin	: Le Pouce PTP01
(c) Projection	: Lambert Conical Orthomorphic
(d) Spheroid	: Clarke 1880
(e) Unit of measurement	: Metre
(f) Longitude of Origin	: 57° 31' 18.58" E
(g) Latitude of Origin	: 20° 11' 42.25" S
(h) False easting at Origin	: 1,000,000mE
(i) False northing at Origin	: 1,000,000mN
(j) Scale Factor at Origin	: 1.00000

# TRANSFORMATION PARAMETERS

## Three Parameter Transformation Clarke 1880 to GDM 2008

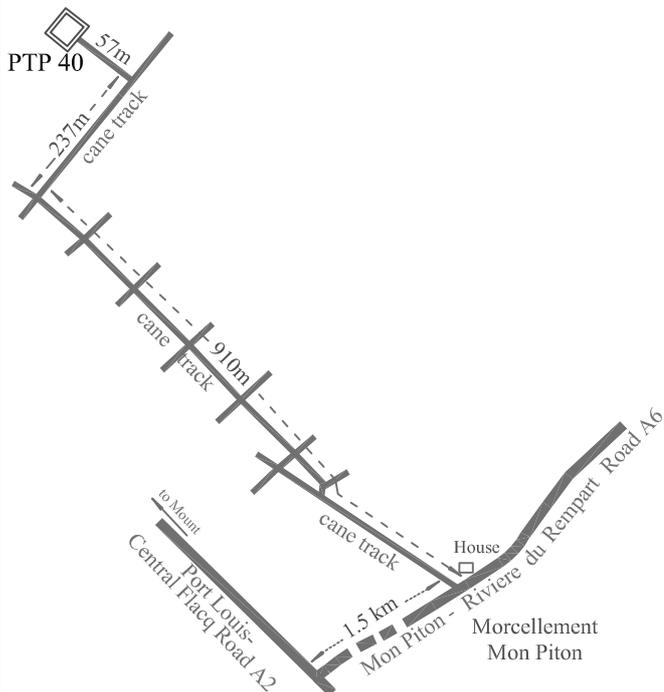

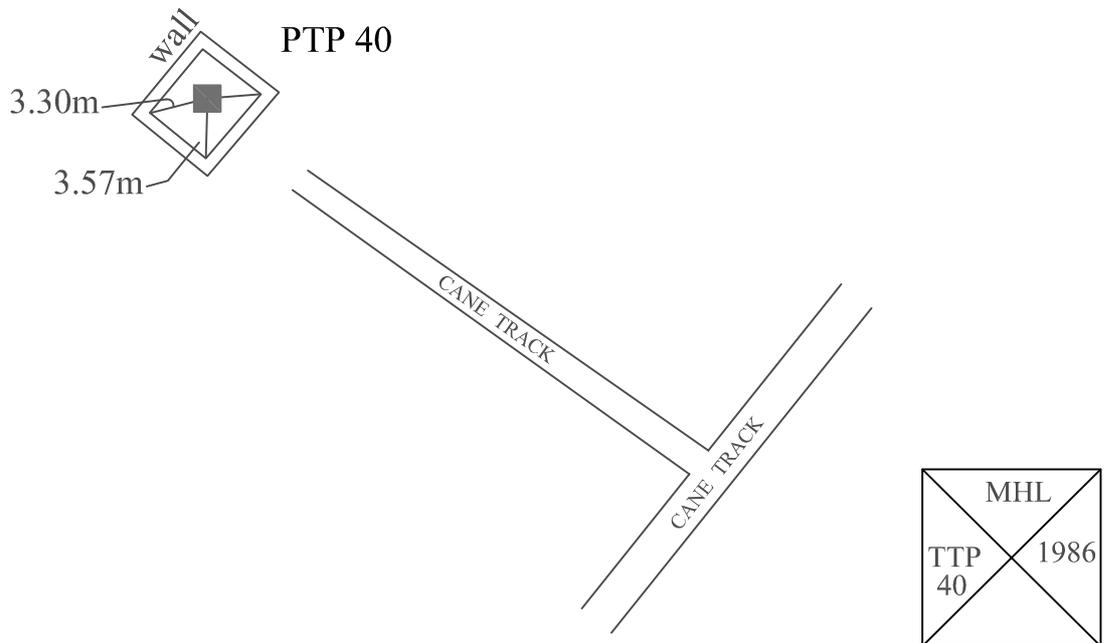

Parameter	Translation (m)
X- axis	-756.089
Y-Axis	171.409
Z- Axis	-503.098

## Seven Parameter Transformation Clarke 1880 to GDM 2008

Parameter		Standard Deviation
X- axis Translation (metres)	-146.610	13.895
Y- axis Translation (metres)	-228.913	11.036
Z- axis Translation (metres)	-139.243	0.026
X- axis Rotation (seconds)	1.0828	0.0029
Y- axis Rotation (seconds)	-18.6823	0.0012
Z- axis Rotation (seconds)	-19.5543	0.1011
Scale (parts per million)	21.28428	0.00437
